

SOLUTION ECO-SYSTEM

B2B ENTERPRISE PORTAL FOR METAL INDUSTRY

The promising Fourth Industrial Revolution is witnessing a close integration between physical machines, assets and digital technologies. Evangelist and Industry consultant believe the opportunities for using technology for problem-solving exist across multiple industries. These technologies are useful for achieving business, commercial and other next generation social objectives.

To accommodate such technological requirement, we have built a first of its kind B2B Enterprise Portal framework that would be suitable for your current and future requirement. The B2B Enterprise Portal framework solves inefficiency and opaqueness every time commerce takes place between a supplier and buyer. With the innovative use of technology, our proposed framework is able to solve these issues, thereby strengthening your distribution networks and supply chains.

FEATURES
