

eCommerce Solutions

Toyaja has years together of experience and a complete understanding on E-commerce portals. Today, we are experiencing technology that meets user expectations beyond imaginations. Simpler, sophisticated and smarter made commerce and trade to highly influential E-commerce platform and reached into the hands of million number of users. This faster growing phenomenon leads to serve almost every industry domain in the world. And also, dynamic change in the trends of technology and growing user expectations, potential risks and all major handling issues in addressing every user has become a challenging factor. We follow the standard process while we design and implement an e-commerce solution. We give an intuitive design at both user and administration level. In fact, it is essential to keep the integrity of any solution and serve with uncompromised quality while meeting the industrial standards. It is our customary to understand our client business, assess the business in meeting with their customers exactly that is what their need and going to be our overall objective.

Key Drivers

Mobility

A rich customer experience online retail platform needs optimized mobile user experience and be with the customer on the go shopping and orders placement.

Future sight

A Cloud based solution for all commercial operations worth using as a single commerce platform enables the reduction of operational costs and gains real-time visibility.

Reach and Retrieve

An efficient way to keep track, manage orders right from company ownership until physical delivery to clients. It is good to have centralized order management across all channels, real-time inventory and globally connected suppliers and distribution partners.

Security

This should be considered as one of the most important key drivers of ecommerce. The security certificate should be displayed on the website to strengthen the belief of every online customer.
